Discord Basics

Basic Formats, Syntax, etc for Discord-side features and options.

- Special IDs
- Building URLs
- Discord Timestamps

Special IDs

Backslash Method:

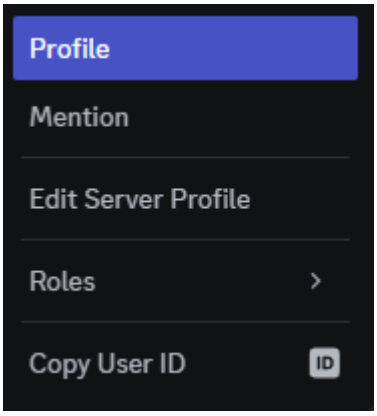

Adding a backslash `\` in front of a Discord Quicklink (Username, Role, etc) will output the exact syntax for mention / use that name, including that link's UniqueID.

Backslash Method:

- User: `@nero` -> `\@nero` -> `<@113659556944020752>` (`<@userID>`)
- Role: `@role` -> `\@role` -> `<@&1128757363898318928>` (`<@&roleID>`)
- Channel: `#channel` -> `\#channel` -> `<#1126708428182659124>` (`<#channelID>`)
- Emoji:
  - Base Twemoji: `:wave:` -> `\:wave:` -> 👋 (prints base emoji, not discord emoji in chat)
  - Custom User Emoji: `:nero:` -> `\:nero:` -> `<:nero:1136364622979539027>` (`<:emote:emoteID>`)
  - Custom Animated Emoji: `:neropeek:` -> `\:neropeak:` -> `<a:NeroPeek:1136478662301069393>` (`<a:emote:emoteID>`)
- For Specific Messages, Threads, or Forum Post, you MUST use the Right Click Method.

Right Click Method:

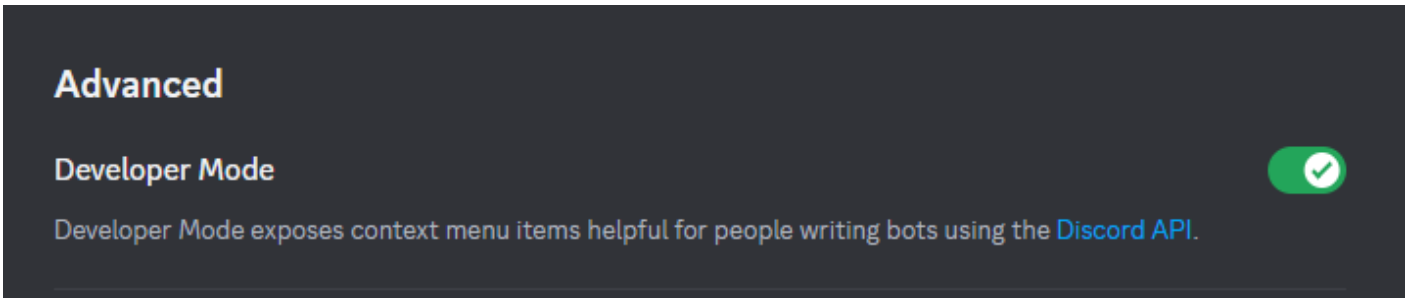

You can Right Click Users, Channels, Emotes, Message, Forum Posts, Threads, and Roles to obtain their IDs.

Enable Developer Mode:

If you have Developer Mode enabled in your Discord Settings, you will have the option to Copy ID's by right clicking elements.

To enable Developer Mode, go into your Settings, under Advanced, and Enable Developer Mode.

Building URLs

Server URLs:

Server Guide:

`<id:guide>`

Channel & Roles:

`<id:customize>`

Browse Channels:

`<id:browser>`

Members Page: *Currently Not Possible*

Event Dialogue: *Currently Not Possible*

Channel URLs:

Channel:

`https://discord.com/channels/serverID/channelID`

Channel to Specific Message:

`https://discord.com/channels/serverID/channelID/messageID`

Channel Thread URL:

`https://discord.com/channels/serverID/threadID`

Forum URL:

Forum Channel:

`https://discord.com/channels/serverID/channelID`

Forum Post:

`https://discord.com/channels/serverID/forumPostID`
